DSYS is a focused, global and innovative provider of IT consulting and outsourced software development services. We provide cost-effective and high quality IT services with a complementary balance of senior IT management, strategy consultants, seasoned IT solutions architects/project managers and qualified software engineers.

DSYS has been providing technology solutions to our clientele since 1996 and provides offshore software development & outsourcing services. We are a professional team of business-minded people who are driven by a clear vision and focus for the success of our clients and our organization.

Best Business Practices

We define our business practices according to a strict set of business rules that are governed by our experience and knowledge. We strive to advance our current capabilities and achieve exceptional results for our products and solutions by way of these factors.

Effective Risk Management

Risk Management is one of these factors and requires well-defined processes, methods, and tools for managing all aspects of a project. We provide a disciplined environment for proactive decision-making to assess risks, determine solutions and implement strategies

Our effective risk management practices include the following components

- Ownership
- Open dialogue
- Integrated management
- Focus
- Defined process
- Shared product vision
- Teamwork

DSYS Approach

DSYS software is at the forefront of driving and managing IT strategies in these vertical segments for various clients. DSYS partners with our clients to constantly enrich and share its vision on the role of technology in shaping business and technology strategies. For this, DSYS has built up dedicated domain competency groups for specific industry verticals. The domain experts from these groups drive DSYS's knowledge capital and thought leadership throughout these segments, deploying them on each individual engagement.
